Competitiveness Test Arcola, Dale City, and Stafford Exchanges

Step A

A minimum of 75% of the households in the telephone exchange area can choose residential telephone service from among at least two (2) competitors to Verizon

This test is met by a number of competitors, including AT&T Wireless, Sprint Wireless and T-Mobile Wireless (see Attachment A-Arcola/Dale City/Stafford Exchange).

Step B

A minimum of two (2) of the competitors to Verizon in part “a” must offer residential local telephone service that may be purchased by the residential customer without a corresponding requirement to purchase non-telecommunications services (e.g., video or broadband internet service) from that competitor

This test is met by a number of competitors, including AT&T Wireless, Sprint Wireless and T-Mobile Wireless (see Attachment A-Arcola/Dale City/Stafford Exchange).

Step C

At least 50% of the households in the telephone exchange area can choose a facilities-based competitor that owns its own wireline network facilities

This test is met by Comcast. Verizon sampled households in the Arcola, Dale City, and Stafford exchanges, and determined that at least 50% of the households in these exchanges have the option of selecting voice service from Comcast. This is supported by information readily available through Comcast Websites and promotional materials.
