DIVISION OF ENERGY REGULATION
STATE CORPORATION COMMISSION

June 21, 2007

Clerk of the SCC,
Document Control Center,
P. O. Box 2118
Richmond, VA 23218

To Whom It May Concern:

The Woodlake Swim and Racquet Club has lighted tennis courts. Each lighted court has twelve bulbs that are one -thousand watts each. The lights are on until eleven o'clock each night. Frequently there are no players on the courts, but the lights remain on. That is a major waste of good energy. I'm sure the same conditions exist at other sports clubs.

New housing projects should not be approved unless they are green houses. Less trees taken down, or a charge of \$1,000.00 per tree.

High rise business buildings don't need to be lit up when no one is working in them.

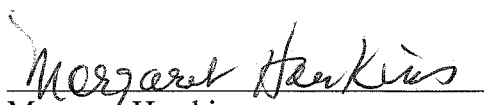

Solar and other forms of energy should have more financial benefits so more people could install them, including me.

Supermarkets should have more energy efficient showcases. It seems like a big waste of energy to have open meat cases.

Ban all incandescent light bulbs as Australia has done. Ninety per cent of my house has the energy saver bulbs. I'm waiting to be able to replace the remaining ten per cent

Imagine the amount of energy it takes to raise and lower toll gates when so many of us have Smart Pass and E-Z Pass. Also, the amount of pollution caused by cars needlessly stopping when they have to wait for the gate to rise.

Very truly yours,

Margaret Hawkins
