Re: King and Queen QF Facility; King and Queen County, Virginia

Dear Mr. Stephens:

We are writing in reference to the 10-MW King and Queen landfill gas power plant (the "Facility"), which is located at 4443 Iris Road, in King and Queen County, Little Plymouth, Virginia. Over ninety percent of the Facility's fuel needs are provided by landfill gas from the King and Queen Landfill; the remainder of the plants fuel needs will be met with No. 2 fuel oil. The Facility is owned by Ingenco Wholesale Power, LLC ("Ingenco") and is interconnected with the 34.5-kV distribution system of Rappahannock Electric Cooperative, which, in turn, interconnects with the Dominion Virginia Power system. The Facility is a Qualifying Facility ("QF") under the FERC PURPA rules, and is in compliance with the requirements of federal, state and local law.

Because the Facility is a QF, we do not believe this letter is required under Section 20 VAC5-302-10 of the Commission's rules. However, we are submitting it as a courtesy to inform you that the capacity of the Facility will be expanded by approximately 4 MW to 14 MW.

Very truly yours,

Mike Ellison
COO
INGENCO
